ALL IS NOT WELL IN EAST IDAHO

After 30 years of total dominance and control of Idaho's governmental apparatus Idaho's GOP has left us with far too many folks being left out of our economic pie. While many folks are doing very well, too many of our neighbors are in the "Working Poor" category. Counties with 1/3 to 2/3 of their populations functioning at bare existence levels ARE NOT the signs of a healthy society. If GOP policies work, why is Idaho one of the poorest states in the union? Idaho can do better!

Idaho Needs A New Generation Of Leadership!
